

Three Branches of Government

(sung to "The Wheels on the Bus")

The three branches of government,
Government, government,
The three branches of government,
What does each one do?

The legislative branch creates our laws,
Writes new laws, passes laws.
Members of Congress make the laws,
Setting down the rules.

The executive branch enforces laws,
Carries out laws, applies the laws.
The president and police enforce the laws,
Making sure they're obeyed.

The judicial branch reviews the laws,
Rules on laws, interprets laws.
Courts and judges judge the laws,
Deciding if they're fair.

The three branches of government,
Government, government,
The three branches of government,
Each one has a special role.
